

Property Address Jane Smith 1234 Morris Lane Ottawa, Ontario Dining Room	Radon Measurement Technician Stephen Ferland Residential Measurement Provider ID # 105225 RT	Device Information femto-Tech CRM-510M Serial#: 5105366 .
---	--	---

Test Information

Test Dates: 07-21-2008 @ 05:50 to 07-23-2008 @ 05:50

Test Location: Dining Room

Your Average Radon Test Result is 54 Bq/m3

Interpreting your Test Result

Health Canada states that remedial measures should be undertaken in a dwelling whenever the average radon concentration exceeds 200 Bq/m3 in the normal occupancy area. (Bq= Becquerel= A unit used to measure radioactivity). Indoor radon levels typically range from about 30 to 100 Bq/m3.

With regards to your results at 54 Bq/m3 you do not need to conduct radon mitigation at this time. However, if you make any structural changes or start to use a lower level of the building more frequently you should test again.

The subject home described has been short term protocol tested for the presence of radon using the device listed. The test and analysis have been performed to comply with Health Canada testing protocol. This certificate represents the average radon concentration at the time the sampling was conducted and at the specific location within the building. However, it must be noted that radon concentrations will vary from day to day and from season to season. No tampering was observed during the radon test.

Limitation of Liability: While we at A Home Check Ltd., make every effort to maintain the highest possible quality control and include several checks and verification steps in our procedures, we make NO WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS with respect to any item furnished, information supplied or services rendered you by A Home Check Ltd.
